Dean of School	Professor Dr. Emre AYSU Head of Architecture (English Prg.): Professor Dr. Demet IRKLI ERYILDIZ Head of Architecture: Professor Dr. T?in G?RG?L?		

GENERAL INFO

Application Deadline:	July (Undergraduate), May (Graduate)
Tuition and Fees:	Detailed information about tuition fees can be found in the university's web-page: <a href="http://www.maltepe.edu.tr/en">http://www.maltepe.edu.tr/en</a>
Accommodation:	There are modern dormitories with 750 student capacity within the university campus.
Setting:	Maltepe University Basib?y?k Campus is located on the Ankara-Eskisehir highway and near the Kayisdagi Forest. All faculties and departments of the university are in the same campus area, except for the "Faculty of Medicine". Dormitories and many social, educational, and technical facilities are within walking distance of the faculties.
Student Population:	969 students (886 Bachelor, 81 Master, 2 PhD) 1 % foreign
Faculty:	90 Staff members (41 full-time and approx. 49 visiting lectures and critics)
Student service/activities:	Extensive university facilities within the campus including; the main library with 200.000 volumes in collection, multi purpose sports halls, closed and open swimming pools, and university's culture and convention center. There are approximately 33 student groups within the university. (for detailed information please see Maltepe University website.)
Facilities:	In addition to the university facilities, Faculty of Architecture facilities include: building and construction workshops and a exhibition hall.
List of Facilities:	24/7 design studio, Audio Visual Lab, Caf?, Cafeteria, Computer Room, Conference auditorium, Construction Lab, Copycenter, Exhibition hall, , Library, Media Lab, Plot centre, Theatre Hall
Admission Requirements:	Detailed information about admissions can be found in the university's web-page.
Language:	Turkish and English

DEGREE PROGRAMMES

Undergraduate 4 years	Bachelor of Architecture (240 ECTS)
Undergraduate 4 years	Bachelor of Interior Architecture (240 ECTS) The undergraduate programs are based on a four-year study leading to the Bachelor's degree with emphasis on architectural design studios.
Graduate 2 years	Master of Architecture (MArch) with thesis and non-thesis (120 ECTS)
Graduate 2	Master of Interior Architecture (MSc) with thesis and non-thesis (120 ECTS)
Graduate 2	Master of Science in Restoration (MSc) with thesis and non-thesis (120 ECTS) The Graduate degrees are two year programmes aims student's to develop professional information both universal and mental extent and produce new knowledge with interdisciplinary interaction.
Graduate 4	PhD in Architecture (300 ECTS) The Ph.D. program in Architecture was opened in the academic year 2008-2009. Durations of completion for the PhD program in Architecture are eight semesters for who are accepted with Masters Degree, ten semesters for who are accepted with Bachelor Degree. Learners can complete their Ph.D. Program before this period and graduate early.

### Profile Description

Architecture is responsible of each stage between desining and production of any place where human life occurs. Architecture can be defined as the meeting point of art, technology and life. As a result of this holistic view, with the recent transformations the profession of architecture has gained a wide range of job site besides classical practices like building production design. The graduates of Architecture faculty have the skills and the knowledge to accomplish every single task at every stage in the field of architecture. An interdiciplinary education-training model called "Integrated Education-Training Model for Design" has been set up and started to be applied at the beginning of the 2011-2012 Fall semester in Faculty of Architecture. This model gives a common education opportunity to interior architecture students with Architecture and Nautical Design programs. According to this, the students of the Interior Architecture Program take common courses with Architecture and Nautical Design programs for the first year. In the second year, students take common courses only with the Architecture program. All the field elective courses of the three programs in faculty are implemented to this common education model."Integrated Design Education Model" gives architecture students the oppurtunity to have an interdisciplinary education in the fields of Interior Architecture and Yacht Design through elective courses. Numerous visiting professors have run design studios and given lecture courses.

### Bachelor Programme

#### Bachelor of Architecture

Undergraduate Program of Architecture aims to educate professionals who have sufficiencies in architectural vision, creative and original design approach, ability of solving problems about application of designs. The target of the program is to be pioneer in the education, preferred national and international platforms, to focus on research and study in the field of architectural design and implementation. Graduates can establish relationship between theory, design and application, understand multi-disciplinary structure of architecture, work coordinately with othe disciplines, have sufficient information about art and technology, define problems

and develop solutions and use digital tools efficiently. Since 2011-2012 Academic Year, Department of Architecture started training in English. The scholars are trained to produce basic knowledge in the field of architecture, to establish the relationship between theory and practice and to investigate. The well-educated grads of the program can easily express themselves in national and international platforms. Students who successfully completed the program acquire the degree of Bachelor of Architecture (Bachelor of Architecture, B. Arch)

#### Bachelor of Interior Architecture

Interior Architecture Undergraduate Program is a program which trains interior architects, who have powerful artistic and technical background in the basic fields of interior space organization and appliance, can design contemporary and unique interior spaces and space equipments, have the skill of solving the needed details to apply the space/equipments which they designed, can determine and create solutions for the problems which they confront during the project process. The education model and the program competences (outputs) have been set according to the orders and criterias of UIA (The International Union of Architects), CIDA (Council for Interior Design Accreditation) and MIAK (Architectural Accrediting Board -Turkey) with a wide perspective and considering the national-international accreditation conditions. Interior Architecture (Turkish) The graduates of the Department of Interior Architecture are entitled to bachelor's degree (Bachelor of Interior Architecture) and can work in design, application and manufacture departments of interior architecture fields.?

#### Bachelor of Nautical Design

Nautical Design is a new technical discipline that emerged at the juncture of architecture, interior design, industrial product design and naval architecture and marine engineering disciplines. The scope and field of activity of yacht design, where styling and interior design play a prominent part, includes all nautical vehicles beside yachts. The various objects of this undergraduate programme are: enhancing its educational potential at the national and international level; contributing to the yacht design market; exalting design as a business and occupation, with the advantages of geographical proximity to regions like Tuzla and Yalova in Istanbul

where the yacht and ship construction industry is based. The yacht design department graduates will get the title nautical designer. The yacht design undergraduate program offers good employment opportunities to its alumni in design establishments specialized in yacht class nautical vehicles, naval architecture establishments, and ateliers and shipyards producing boats of various sizes.

#### Bachelor of Graphic Design

In the programme of Graphic Design, with the knowledge and skills to compete at the international level, communicators who are capable of individual for group graft, embraced the importance of lifelong learning, followed and contributed to developments in the area, creative, self-confident and sensitive to universal values depending on the ethical principles and a sense of responsibility to provide training for the development of advanced graphic designers. In the national and international level, graphic design is equivalent of the prestigious performing organizations, preferred in the area of graphic design graduates, post-graduate education that prepares and views on new technology, training that takes gaff in the professional activities, the image of a partition is to be high.

#### Master Programme

The Graduate Programs at Maltepe University Department of Architecture that leads to Master of Architecture (MArch) with thesis and non-thesis, Master of Interior Architecture (MSc) with thesis and non-thesis, Master of Science in Restoration (MSc) with thesis and non-thesis degrees, are two year programs. The Master of architecture program aims to manage to fulfill high class architects for providing more intimate information about architecture, developing specializing, following information and technology to contribute instruction and education, reaching international standards and conservation of environmental dignity. To reach these targets, strategies like, to do practices for the needs of the country, to consolidate of the university with society, to do qualified researches and to evaluate the cultural circumstances are taken into consideration. Master of Interior Architecture aims student's to develop professional information both universal and mental extent and produce new knowledge with interdisciplinary interaction. The program also promotes students to associate this information with interior

architecture production by aesthetic and ethical concerns and overseeing society and the environment. This program aims to work interactively with other disciplines, to produce new knowledge and to specialize in selected areas. Program also promotes and encourages the development of individual, community and environmental sensitivity with critical and free thinking at all stages of education. The M.S. in Restoration program includes modern conservation principles urban conservation, new techniques in restoration, inventory, building survey, reassembling, restoration projects, developing proposals for historic settlements as well as theoretical and practical courses, seminars.

#### PhD Programme

Ph.D. Program in Architecture is a program aimed at providing an advanced education, increasing theory, design, information, technology, research in the areas of building materials and educating researchers and practitioners who respect environmental and cultural values and develop new techniques for those who wish to pursue a career as an academic. The primary objective of the Ph.D. program realizes a bringing innovation in architecture, creating a new model, developing of a new scientific method, proving a hypothesis that an area designated with knowing or developing methods, the documenting in Ph.D. thesis. At the end of the Ph.D. thesis, the person who prepared the thesis, gains in-dept expertise about the investigating subject area and leads to the new subject area which will be developed academical and generative. Also Ph.D. is instrumental in doing determination of area of expertise for the process of academic studies to be conducted and the academician as a first step of academic development. Durations of completion for the PhD program in Architecture are eight semesters for who are accepted with Masters Degree, ten semesters for who are accepted with Bachelor Degree. Learners can complete their Ph.D. Program before this time and graduate early.
