EAAE Newsletter

Educating Architects Towards Innovative Architecture
INTERNATIONAL CONFERENCE
enhsa-EAAE

Istanbul 17-19 June 2010
Yildiz Technical University of Istanbul, Faculty of Architecture

Innovation is a fundamental condition of architectural creation. All architectural development in time is based upon the critical questioning of some aspects of the pre-existent and established formal expressions and of their underlying values and principles. This critical questioning of the established is the power of architectural creation, the energy of the act of design, the leading force of architects' formal decisions. There can be no architectural creation without overcoming the existent, without remodeling, reorganizing or reconstructing to a certain extent the established; that is to say, there is no architecture without innovation.

We are experiencing a world that is changing extremely fast. Structured upon an increasingly internationalized knowledge-based economy, facilitated by the already powerful media and the extended applications of digital technology in all sectors of production, administration, education and consumption, this world is conditioned to be rapidly transformed. The mental and operational landscape of our life is every day affected by unexpected modifications of possibilities, capacities and conditions influencing our social, financial, cultural and built…
