

# Research Academy

## Invitation for Participation in the Workshop Research through Design Studio

Madrid, 15 June 2018, 14.00-18.00

Superior Technical School of Architecture of Madrid (ETSAM), Av. Juan de Herrera, 4, 28040 Madrid, Spain

The EAAE Research Academy (RA) is a think-tank, articulating and promoting common concerns and interest in architectural research. It offers a platform for reflecting upon, and responding to topical issues, thus revealing and underpinning actions, claims, and positions to be taken, inside and outside of EAAE.

### **Discussion 1: Research Academy Projects**

Building on the EAAE Charter on Architectural Research heritage, the Periodicals Database development and on the RA workshops during the last three years, the RA is developing a set of research projects for the EAAE context. At this workshop we would like to discuss these projects and their further development to enhance their relevance for the EAAE member schools.

### **Discussion 2: Design Studio: Emerging Insights**

We are organizing the Research Session at the EAAE Annual conference in Porto (29 Aug – 01 Sep, 2018 Faculty of Architecture University of Porto). The conference addresses the Design Studio as a laboratory for interactions between architectural education and society. The research session focuses on the lab-idea: The Design Studio is a place for emerging insights. It requires and develops a reflective research climate, includes both research by and for design. It develops a specific research role of architects: a knowledge translator.

We cordially invite you to develop the EAAE Research Academy mission!  
Please register here by 7/6/18!
