Building Knowledge in Architecture

Richard Foqué

UPA book

Building Knowledge in Architecture offers the necessary means for an improved understanding of individually used design methodologies in both academic and professional environments. The book develops a theoretical framework and practical instrumentation to establish a knowledge base for the discipline of architecture.

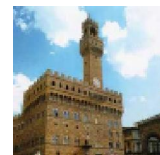

Richard Foqué is at once an architect, educator, researcher and scholar. His career spans 40 years of lecturing, practicing, teaching and writing. He is professor and dean emeritus at the Henry van de Velde Institute of Architecture, University College Antwerp and taught for 25 years at the Technical University of Delft.

He has been an active member of the EAAE for many years, participating actively in all the Hania meetings.
