

EAAE – ENHSA NETWORK ON CONSERVATION

**IV Meeting and Workshop organized by:
Faculty of Architecture of “Sapienza”, University of Rome**

**“Restoration/Reconstruction.
Small Historic Centers:
Conservation in the midst of Change”**

Roma-Castelvecchio Calvisio, Italy – 2013 October 28th - 31th

SITES

Castelvecchio Calvisio, is a little town in Abruzzo, next Gran Sasso mountain, 1050 m high, built in the medieval age. It has a regular fusiform plant bordered by wall-houses, with few towers for defence. The building structure is very compact; it is composed by small housing cells on a regular system of roads, these are perpendicular to the main street, pointing from north-west to south-east.

1743	the Barony goes, as allodial condition, to the Kingdom of the Two Sicilies	from Marsili 1984
1810	Castelvechio ha 120 families and 552 inhabitants	from Marsili 1984
XIX	iconographic picture of the small city	ASA, acts and public domain, cart. b132, f. 64
1906	Castelvechio gets administrative autonomy from Carapelle Calvisio and begames Comune	from Barbato, Del Bufalo 1978

The history of the territory is fairly well known, but the nature of the architectural and urban structures is not clarified by the few archival sources. The direct analysis of the built is very important for a good comprehension of the problems. The urgency of reconstruction after the earthquake needs to focus the genesis and the transformation of sites, that still maintain a good level of authenticity. This is the only guarantee for the mantenance of the historical character of the site
