Application for the Election of Council Members

Dear EAAE President, Council and Assembly,

I am hereby applying for the position of EAAE Council member, following a keen involvement in activities of the Association, specifically the Education Academy. Through this engagement, I have intensely continued developing and broadening my interest in various aspects of architectural education, as well as taking the opportunity to engage in discussion on the state of change affecting both architectural education and architecture as a discipline.

The topics addressed through workshops and discussions of the Education Academy are particularly relevant to the Faculty of Architecture in Zagreb, where I teach architectural design, as it finds itself in a state of introspection brought about its upcoming centennial, of positioning itself in the regional and European educational context, of questioning the fundamental outcomes of education for a profession which is taking on ever-broadening emerging fields, operating in uncertainty. These reasons have motivated me to approach the ongoing discussions with passion, joining the exploration of burning issues in the education of an architect.

I value the actions the Association is taking to open up debates, research topics, workshops and other forms of collaboration, nurturing a growing network of schools, sharing experiences and providing a unified platform for free discussion.

As a Council member, I would contribute to their organization, providing a specific perspective stemming from a context less-regulated, a place of varied identities, a border of cultures. In this respect I would gladly engage in the organization of conferences, seminars, workshops and discussions and hopefully utilize my experience as teacher, researcher and architect, but also put previous experiences in organization, editorial work and professional service to use in fulfilling the duties of the Council.

Respectfully yours,

Mia Roth-Čerina
