EAAE Oslo Pledge for Climate Crisis and Sustainable Future

(revised version after Deans' Summit; 29.4.2021)

At the EAAE's First Deans' Summit,

we make a pledge for common action to address the global challenges of climate change, environmental decline and to work towards sustainable futures.

we recognise the climate crisis as the most significant issue within our lifetimes, and our institutional responsibility to promote conditions that support quality of life and dignity for future generations and our planet.

we promise to incorporate the current concerns into common values and to choose the right measures in aligning our curricula and research to confront these wicked problems with the urgency, leadership and prominence they demand, hereby aiming for the construction of a shared European frame of reference.

we recognise equality and diversity within our communities as significant factors for good, and will continue to engage in ethical and sustainable design and building practices that respect the diverse cultural roots and traditions of our institutions, and commit ourselves to communicate, share and promote the best practice identified.

we commit ourselves to document and disseminate the progress we make, engage in continuous processes of reflection and engage with all stakeholders to ensure immediate and sustained impact for good over the next 12 months.
