Application for the Re-election of Council Member

Dear EAAE President, Council and Assembly,

I am hereby applying for the re-election as EAAE Council member, following a keen involvement in activities of the Association, specifically the Education Academy. Through this engagement, I have intensely continued developing and broadening my interest in various aspects of architectural education, as well as taking the opportunity to engage in discussion on the state of change affecting both architectural education and architecture as a discipline.

Over the past years, the activities I have engaged in have proven as an enriching experience for the Education Academy, the EAAE, my school and myself. Here specific reference is given to the organization of the EAAE annual conference in Zagreb in 2019, titled The Hidden School, exploring architectural education in-between the curricular lines. In continuation I have taken part in establishing a new publishing platform for the EAAE, as an open-source and cross-referenced platform developed with council colleagues and member schools. In an effort to continue the enriching activities of the Education Academy, I have taken part in establishing the pEA, a platform of the Education Academy which firstly explored issues related to remote teaching through a series of workshops and published subsequent contributions on the platform.

The issues explored within these activities have provided ground for further directions in research on architectural education facing contemporary challenges, and I will gladly continue examining matters of importance to architectural educators as well as students and graduates, contributing to futures for a relevant and empathic profession.

Respectfully yours,

Mia Roth-Čerina
