NET BOOK VALUE AT THE END OF THE PERIOD	(21)	550,55	

VALUATION RULES

The valuation rules were drawn up by the Board of Directors of the association and meet the requirements of prudence, honesty and good faith. Account is taken of the principles of continuity, prudence, consistency, individual valuation, and allocation of costs and income to the year to which they relate. The rules are applied consistently and systematically year after year. They do not depend on the result for the financial year. Deviations are mentioned and explained in the notes to the annual accounts.

Valuation rules on depreciation and amortization:

- General: the starting point for the valuation is the acquisition value. Every component of the assets is valued at its acquisition value, and shown on the balance sheet at that amount, minus the depreciation allowed, except if application of that valuation rule does not lead to a realistic and faithful picture, in which case a derogation is allowed. Acquisition value is deemed to mean the purchase price, which may contain additional expenses as well as the purchase price, such as transport costs, registration fees, installation expenses, etc. If the acquisition value is unknown, for example in the event of a donation in kind, then the item is entered into the account at its market value. Certain fixed assets may be revalued if the value of the asset exceeds the book value in an indisputable and lasting way. If the value of an asset is indisputably and lastingly below the book value, then additional or exceptional depreciation or a write-down of its value may be carried out.

Items are entered as assets from an acquisition value of 1.000 EUR. If various components of a larger item each have a value of less than this threshold value, they may be amalgamated and entered nevertheless as assets (e.g. furnishing of an office with tables, chairs and cabinets; purchase of monitor, PC, printer and scanner which jointly form a workstation, etc.).

- website development is depreciated over 2 years
- IT is depreciated over 3 years
- plant, machinery and equipment over 3 years
- furniture over 10 years
- all depreciation is linear.

Valuation rules on amounts receivable:

Write-downs are applied to receivables, if there is doubt about all or part of the receivable will be paid on the due date. Write-downs may also be applied if their disposal value on the date of the end of the financial year is lower than their book value. In practice, when the accounts for the financial year are closed, overdue customer invoices and amounts receivable are examined for their creditworthiness.

The valuation rules have not changed compared to the previous financial year.
