

**Why KU Leuven, Faculty of Architecture
finds it essential to participate in the EAAE Pedagogy Awards**

Architectural education is, or should be, in permanent flux. It is impossible, intolerable, and unendurable to cling to existing models, although some models and methods have proven their validity. Rethinking, exploring, and experimenting is inseparable to the design disciplines, the unbound field of practices, and by this to their education. Exploring designerly in, and for, a fluid and diverse society with shifting, altering and unknown challenges is the base for the Faculty of Architecture of the KU Leuven to stimulate our teachers to explore eternally and ceaselessly the educational realm.
