Application for position of Vice-president of the EAAE

Dear EAAE President, Council and Assembly,

I am hereby applying for the position of Vice-president of the EAAE, building on my active involvement in its activities as Council member. This involvement has deepened my interest in architectural education, understanding the pertinent problems affecting it and exploring pathways of its improvement and alignment to current issues.

My experiences over the past years, particularly in organizing the 2019 EAAE annual conference in Zagreb, participating in Education Academy workshops, co-establishing the Platform of the Education Academy, and expanding the EAAE Publishings platform, have been beneficial to both myself as educator and the Association. In the latter I have closely collaborated with newly elected president, Roberto Cavallo, and see this as an opportunity to continue these successful cooperations and directing new avenues within the EAAE. These initiatives have opened new platforms supporting the practice of architectural education, which I'd gladly expand.

I am eager to continue exploring essential matters for educators, students, and graduates, contributing to the support and development our profession as teachers and architects.

Respectfully yours,

Mia Roth-Čerina
